KISHU INU

WHITEPAPER

Kishu Inu ($KISHU):
community-focused decentralized
transaction network.

www.kishu.finance

INTRODUCTION

Kishu Inu is a community-focused decentralized transaction network. Kishu is fully decentralized, and all decisions are made by the community. Kishu Inu was fair-launched, and the dev team has no 'team tokens'. In other words, our creators had to purchase $KISHU on the open-market.

DISCLAIMER

The information shared in this whitepaper is not all-encompassing or comprehensive and does not in any way intend to create or put into implicit effect any elements of a contractual relationship. The primary purpose of this whitepaper is to provide potential investors with pertinent information in order for them to thoroughly analyze the project and make an informed decision. Prior to your participation in Kishu Inu, we strongly advocate a careful study of this whitepaper. Certain statements, estimates and financial information featured in this whitepaper are based on and take into consideration certain known and unknown contingencies and risks which may cause the estimated results or may differ factually and substanially from featured statements or results extrapolated or expressed in such forward looking statements here-with.

01
Abstract

Cryptocurrencies continue to draw major attention from investors, entrepreneurs, regulators and the general public.

Kishu Inu was created with the sole purpose of proving to the world that a Meme Coin or, better classified as a "Dog Coin", could become much more than just another Meme project. Kishu was developed with a vision of truly revolutionizing the cryptosphere - in essence, to become the first Dog Meme Coin with actual value.

On the surface, this is a Dog Coin, but in the "holders wallet" a different story is being told. One of the most exciting aspects of $KISHU token is the redistribution mechanism that rewards 2% of every single buy or sell transaction directly to existing holders. When investors hold Kishu, their wallet balance continues to increase automatically. The 2% distributions are calculated based on the size of the transaction and then distributed to Kishu holders proportionally to the size of the individuals holdings.

Kishu Inu was fair-launched. No team tokens were given out and all team members would have to buy the $KISHU token on the open market. Within the first week of launch, Kishu became a fast-growing, diverse community working together to make Kishu the next big Meme Coin.

02
Values

TRANSPARENCY

We maintain open communication with our investors so they can stay current and informed with every step of Kishu's growth.

COMMUNITY

Ultimately, Kishu is owned by the community, meaning we encourage group efforts related to marketing, development, community management and more.

TRUST

In the cryptocurrency market, Trust is paramount. That means not only providing transparency, but also security related to investor funds. Examples include audits of Kishu's code, and liquidity tokens being burnt to eliminate risk of malicious behavior.

LONGEVITY

Kishu is in it for the long haul. Our plans are for long-term development of the ecosystem which result in a fruitful investment beyond any temporary trends.

03
Ecosystem

$KISHU TOKEN

$KISHU is an ERC20 token launched on the Ethereum blockchain April 17, 2021.

The max supply is 100 quadrillion $KISHU, none of which was withheld as Team tokens.

The key functionality of the token is its built-in redistribution mechanism. For every transaction (buy or sell), 2% is sent to existing $KISHU investors as a reward. That means their wallets increase automatically over time.

Upon listing on Uniswap exchange, 50% of the Liquidity Pool (LP) tokens were burnt (sent to a dead address), while the other 50% was sent to the wallet of Vitalik Buterin (founder of Ethereum) as a symbolic gesture.

UNISWAP EXCHANGE

With close to $2 billion in daily volume as of April 2021, Uniswap is a premiere decentralized exchange (DEX) for ERC-20 tokens, and the initial home of $KISHU.

ETHEREUM BLOCKCHAIN

$KISHU was launched on the Ethereum blockchain as an ERC20 token. This decision was made due to Ethereum's expansive reach and the ability to interact with other ERC20 tokens.

04
Tokenomics

ABOUT $KISHU TOKEN

$KISHU is an ERC20 token launched on the Ethereum blockchain April 17, 2021.

KEY DETAILS

Token Symbol	$KISHU
Max Supply	100,000,000,000,000,000
Liquidity sent to burn address	50%
Liquidity sent to Vitalik Buterin (Ethereum founder)	50%
Rewards to holders per transaction	2%

REDISTRIBUTION MECHANISM

The key functionality of the token is its built-in redistribution mechanism. For every transaction (buy or sell), 2% is sent to existing $KISHU investors as a reward. That means their wallets increase automatically over time.

LIQUIDITY BURN

By burning 100% of the liquidity tokens, there is zero risk of 'rug pull' (the ability for a malicious actor to pull out the liquidity for themselves). This provides additional security to our investors.

05
Roadmap

PHASE 1 - LAUNCH

P1
- 5,000 Holders
- Official Website Launched
- Partnership with $HOKK Token
- CoinGecko Listing
- CoinMarketCap Listing
- 2,000 TG Members
- Community Marketing Fund
- Phase 1 Marketing Campaign (YouTube, TikTok, Twitter)
- 10,000 Holders

PHASE 2 - EXPAND

P2
- 10,000 TG Members
- CEX Listing
- 20,000 Holders
- Ecosystem Partnerships
- 25,000 TG Members
- Farming Dapp
- 50,000 Holders
- NFT Creation w/ Rewards - Roadmap
- Launchpad (Dog Park)

06
Funding

Kishu is a community-owned project with no tokens reserved for the team. Therefore, it runs primarily on volunteers and donations from the community.

USE OF RAISED FUNDS

Funds contributed by our community will go towards three things:

1) Marketing
Hiring social media influencers, digital advertising, real-world promotions

2) Exchange Listings
Increasing our reach by listing on new exchanges beyond Uniswap

3) Product Development
Executing our roadmap and expanding the Kishu ecosystem

OFFICIAL DONATION WALLET

0xB7852D285f31B740318CAb51Bd0E5E7936073725

Accepts: Any ERC20 token
Prefers: $KISHU, $ETH and $USDC

THANK YOU
